

The Journal of Engineering Technology

The Journal of Engineering Technology is a high-quality refereed/peer-reviewed journal. The *Journal* covers topics that appeal to a broad readership of all branches of engineering technology. The *Journal* is mailed to approximately 1700 individuals and institutions every time it is published.

Some of the changes recently implemented by the *Journal of Engineering Technology* Board include a more rigorous peer review of every manuscript submitted for publication consideration. Each manuscript will now be reviewed by four peer reviewers. The Editorial Board is also considering a mechanism for electronic submission and review of the manuscripts submitted for publication consideration. In addition, the Editorial Board is considering moving the Engineering Technology Annual Bibliography (published every year during Fall issue) to the *Journal of Engineering Technology* website. This action will allow the Editorial Board to increase the number of manuscripts in the Fall issue.

Respectfully Submitted By,
Sohail Anwar, Ph.D
Editor-in-Chief
