ABOUT THIS GUIDE
To submit a paper to the Journal of Engineering Technology (JET), follow the instructions in this guide. This guide is updated periodically; authors should review all information in this guide before submitting papers for consideration. This guide covers the organization and formatting of manuscripts as well as instructions for submission. Papers that do not follow the guidelines will be returned to the author without review.

GENERAL REQUIREMENTS AND GUIDELINES

Manuscript Requirements
Language & Quality: Submit all papers in English. The author is responsible for ensuring the readability and quality of the submission in order to help reviewers to adequately assess technical content. If necessary, seek editorial assistance before submitting your paper.

Plagiarism: Plagiarism is not acceptable. Phrases, sentences, or sections taken from another document, even if it is your own work, must appear within quotation marks with the appropriate source citation.

Submit to Other Journals: Do not submit a paper to JET if you have already published it in another journal or conference proceedings.

Commercial or Special Interests: Authors are responsible for ensuring that submitted papers do not advocate special interests or are commercial in nature. Papers that do so will be returned to the author without review. A paper also may be removed from peer review if it describes the properties of a product without disclosing its composition or manufacture. Use generic names of products and equipment unless the trade names or manufacturer’s names are essential to the purpose of the paper.

PAPER SPECIFICATIONS

Titles
Title should be clear, concise, and avoid lengthy clusters of nouns. Use Times New Roman, 14 point, bold and centered.

Abstracts
Include an abstract no longer than 250 words that summarizes your paper by briefly describing the main objectives and scope; techniques, approaches, and/or methodology; and findings and conclusions. Define all unfamiliar terms and acronyms; do not include reference citations or equations/lists.

Author Names and Affiliations
Include accurate and current mail delivery information—name, affiliation, street address, telephone number, fax number, and e-mail address—for each author on the title page. Designate one corresponding author for papers with multiple authors.
Style

Organization of Manuscript
Submit the manuscript in a single electronic file organized as follows:

- Title page, including submission date and author names, affiliations, addresses, phone numbers, fax numbers, and e-mails (please indicate corresponding author)
- Abstract
- Body of paper, with figures and tables embedded as closely as possible to the related text
- Acknowledgment (if appropriate)
- References

Manuscript Page Setup

- Margins: 1 in (25.4 mm) all around
- Font (typeface): Times New Roman, 12 point
- Numbering: Do not number pages
- Spacing: Double-spaced
- Line-number all text
- Paragraphs: Indent first line 0.5 in.; do not use an extra line space between paragraphs, and adjust Word formatting to remove extra spacing before and after paragraphs
- Headings and Subheads: Include clearly distinguished headings and subheadings
- Table titles and figure captions:
  - Table 5. Effects of All Factors. (Insert title above the table; title is initial capitals; all type is boldface; period at end of caption.)
  - Figure 3. Example of Results. (Insert caption below the figure; title is initial capitals; all type is boldface; period at end of caption.)

REFERENCES

REFERENCE AND CITATION FORMAT
Chicago style uses an author/date form of text citation for science, engineering, and technology, rather than superscripted or bracketed numbers. Citations include pages numbers consulted or quoted. Examples appear below the example reference list entries. Most website citations include access dates, and for articles from online journals, the DOI (digital object identifier, a permanent designation) is standard, rather than a URL. If the article does not have a DOI, use the URL instead.
The reference list at the end of an article is alphabetized and headed References.

Note that the Chicago manual also includes standard notations for other items, such as units of measure, and explains formatting for graphics.

R Reference list
C In-text citation format

**BOOKS**

**One author**

C (Petroski 2010, 100*) *Page numbers refer to pages consulted or quotation location.

**Two or more authors**

C (Brockenbrough and Boedecker 2003, 27-35)

**Four or more authors**

List all of the authors in the reference list; in the text, list only the first author, followed by et al. and others:

C (Barnes et al. 2010)

**Multiple works by the same author**

Instead of repeating an author’s name, use three dashes, and list the items chronologically.

C (Petroski 1982, 67)

C (Petroski 2010, 99-100)

**Chapter or other part of a book**

C (Rose 1997, 77)
Corporate author

C (Asphalt 2001, 65)

JOURNAL ARTICLES

Article in a print journal

In the text, list the specific page numbers consulted. In the reference list entry, list the page range for the whole article.

C (Woods 2000, 445)

Article in an online journal

Include a DOI, if the journal lists one, and an access date. If a DOI is not listed, include a URL and access date.

C (Baker 2008, 202-4)

Article in a newspaper or popular magazine

Newspaper and magazine articles include dates, rather than volume numbers. Include an access date and URL if the article is available online. If the article is a press release or no author is given, list under the title.

C (Seabrook 1994, 72)

C (“Deception” 2003)

OTHER ITEMS

Thesis or dissertation

C (Blackmon 2003)

Conference paper (unpublished)

C (Loui 2008)

Conference paper (published)

C (Liu 2006)

Website

Because websites move and/or frequently change URLs, include an access date. If the publication date is not noted, use the “last-modified date.” If no author is indicated, list under the title.

C (Linder 2002)

Blog, email, or text message

Cite these in running text (“An entry posted to Engineering Ethics Blog on September 13, 2010, “In an email to the author on March 7, 2009, . . .””), and do not include in a reference list.

Item in a commercial database

For items retrieved from a commercial database, add the name of the database and an accession number following the facts of publication. In this example, the dissertation cited below is shown as it would be cited if it were retrieved from ProQuest’s database for dissertations and theses.

Book published electronically

If a book is available in more than one format, cite the version you consulted. For books consulted online, list a URL; include an access date only if one is required by your publisher or discipline. If no fixed page numbers are available, you can include a section title or a chapter or other number.

(Austen 2007)

(Kurland and Lerner, chap. 10, doc. 19)

**METRICATION**

Provide measurements in both SI (metric) and US customary units. After the measurement unit of the original research, include the equivalent conversion in parentheses.

**GRAPHICS**

All graphics in your paper must be original. Charts, diagrams, etc. from an already-published source are acceptable *only* if accompanied by permissions from the original publisher. A simple citation in the text is not sufficient. In your caption, include the phrase “reprinted with permission from _____.”

**PAPER SUBMISSION**

Submit papers in Microsoft Word (*.docx) format. The paper must be ready for blind review, all affiliations must be removed, and title page must be separate so that it can easily be prepared for blind review.

- **Line numbering:** Turn on document line numbering as continuous.
- **Fonts:** Use Times New Roman, 12 point, as described in the section on manuscript page setup.
- **Charts:** Click on Paste to insert charts or images from other applications into the Word document. Do not use Paste Link.
- **Equations:** Check the equations to ensure that symbol substitutions are correct.
- **Images:** Whenever possible, use the .jpeg image format instead of .bmp, because .jpeg images are compressed. Images should be grayscale or CMYK color. Images and tables that were not produced by the authors must not be used in the paper without permission. Authors must include permissions for images and tables from other sources.
- **Manuscripts** already published in another journal or conference proceedings must be substantially different for publication in the *Journal of Engineering Technology*.

If the manuscript is accepted for publication, the corresponding author will receive further instructions for graphics, biographical sketches of authors, etc. to meet publication requirements.

Authors of accepted manuscripts are responsible for page charges of $75 per journal page. (A printed page of text contains approximately 750 words, roughly three double-spaced typed pages. Estimate the space required for tables and figures.) The page charge includes two complimentary copies of the journal issue.
